***Detailed Action***

This is the fourth Office Action corresponding to amendment filed Feb 23, 2005. The application contains 33 claims. The text of those sections of Title 35, U.S. Code not included in this action can be found in a prior Office action.

***Claim Rejections - 35 USC § 112***

Claims 48, 49 and 74 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention. These claims depend from cancelled claim 47.

***Claim Rejections - 35 USC § 103***

Claims 45, 46, 51-55, 63, 64-68, 70-75, 76, 77 and 78 are under 35 U.S.C. 103(a) as being unpatentable over Schulze (Pat No 1,386,078).

The patent to Schulze shows an accessory for a container (plate) comprising first and second clamping members, the first clamping member (2) comprising a plurality of extending portions (2, 2) defining first and second clamping surfaces (areas contacting the plate), the second clamping member (1) defining a third clamping surface (area contacting the plate); the third clamping surface disposed between the first and second clamping surfaces (Figs 1 and 3), with each of the extending portions extending away from the vertical axis of the second clamping member. The second clamping member

Art Unit: 3632

comprising a holder having third (6) and fourth (8) clamping surfaces holding an object.

As to the display means recited for example in claim 63, any of the flat surfaces shown by Schulze in Figs 1 and 3, can be considered as a means for displaying information since they are capable of receiving written information, directly (writing on) or indirectly (like a card). As to claim 53, Fig 2 of Schulze shows the first and second clamping members forming a U-shaped defining a space for receiving the container. The material from which the device is made is considered an obvious matter of engineering having no patentable significance. The deformation of the members of the instant invention is inherently to the material from which the device is made.

*Allowable Subject Matter*

Claims 50, 56-62 and 69 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

Claim 49 would be allowable if rewritten to overcome the rejection(s) under 35 U.S.C. 112, 2nd paragraph, set forth in this Office action and to include all of the limitations of the base claim and any intervening claims.

*Response to Arguments*

Applicant's arguments have been fully considered but they are not persuasive. Applicant's arguments are mostly address to the container per se, and to the elastic deformation of the extending portions. The container (as recited in claim 45) is not a positive element of the combination; the device shown by Shultze discloses a container capable of supporting liquid. As to the elastically deformable portions, the instant specification makes reference to it on page 8, lines 9 and 10, and only states the clamping member can elastically deform to some extent. As indicated in the above rejection, this deformation is inherent from the material from which the device is being made. Applicant also points-out that Schulze does not show clamping surfaces "pressed" against the container. Schulze shows clamping surfaces contacting the container surfaces, this reads on the claims. If Applicant means the clamping member is applying pressure to the surfaces, Schulze would also meet this, since if not, the device would fall-off from the container.

*Conclusion*

**THIS ACTION IS MADE FINAL.** Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire **THREE MONTHS** from the mailing date of this action. In the event a first reply is filed within **TWO MONTHS** of the mailing date of this final action and the advisory action is not

Art Unit: 3632

mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the mailing date of this final action.
